FOR IMMEDIATE RELEASE

High-Quality Aluminum Profiles with Display Finish

DesignLine offers aluminum framing with a polished appearance.

Rexroth's new DesignLine coated connectors offer the same ESD compatibility as the standard connectors, but bring the bolt-together simplicity of aluminum framing to applications requiring a highly attractive appearance.

(Buchanan, MI – www.boschrexroth-us.com) To meet the needs of designers using [aluminum framing](#) for applications with a more polished appearance, Rexroth now offers a DesignLine version of its standard connectors.

Die-cast aluminum cube connectors, T connectors and end connectors, as well as 45° connectors, swivel arm joints, swivel bearings and gussets now come with a silver ESD coating. The set also includes plastic caps to cover holes in smooth-sided

profiles, thus preserving the system's appearance while preventing the accumulation of dust and other contaminants.

All connectors are ESD-compatible and are delivered in a complete set with all required mounting hardware. The high-quality appearance that matches the aluminum profiles makes Rexroth's aluminum framing system ideal for designer furniture, architectural applications, trade show and museum displays, as well as sales showrooms—all growing areas that are already using aluminum framing.

Rexroth's aluminum framing system offers the most extensive range of profiles, connectors and accessories on the market. All components are precisely engineered for optimum fit and finish, and the system's bolt-together design saves significant time in the construction of frames, enclosures, workstations and numerous other applications in virtually any industry. Standard T-slots and center bores in the aluminum profiles allow for the widest use of Rexroth's broad range of accessories, so users can easily add onto or reconfigure structures at any time—without the time-consuming additional effort of welding and painting.

With its focus on function and rugged construction, since its launch more than 30 years ago, Rexroth's product line has developed into the world's leading aluminum
