

EconoDot™ – New Product Release
FOR IMMEDIATE RELEASE

Glue Dots International Introduces the EconoDot™

Glue Dots offers affordable, simplistic yet productive adhesive application solution.

NEW BERLIN (WI.) – Glue Dots International, the manufacturer of innovative Glue Dots® adhesives, introduces the **EconoDot™**, a simple, affordable table-top adhesive dispenser for any packaging project on a budget.

The EconoDot dispenses clean, instant-bonding Glue Dots® one at a time at a rate of 60 adhesives per minute without burns or the mess of excess glues. No machine programming is required. The user simply loads a roll of Glue Dots® adhesives, threads the machine and turns on the power. Clean, instant-bonding Glue Dots® automatically present themselves each time the operator presses an item to the adhesive resting on the nose plate.

“Combining precision, low maintenance and economy, the EconoDot helps customers improve productivity within tight budget parameters”, said John Downs, president of Glue Dots International.

Value and safety are significant benefits to using the EconoDot. The dispenser and Glue Dots® adhesives serve to eliminate the need for messy hot glues and their expensive application systems. As a turnkey gluing solution, the EconoDot quickly and easily integrates into any production facility, so your project is up and running in minutes.

With no hoses, nozzles, or moving parts the EconoDot requires virtually no maintenance, and it holds a roll of up to 8,000 Glue Dots®. It’s easy to reload and restart, minimizing production downtime. Priced less than most adhesive dispensing systems, the EconoDot is a cost-effective, smart choice for a variety of packaging applications.

For more information about the EconoDot or to find your nearest distributor, call (888) 688-7131 or visit www.gluedots.com.

About Glue Dots International

Founded in 1995, Glue Dots International revolutionized the adhesives industry with pressure sensitive Glue Dots Brand Adhesive Products.
