**Norgren demonstrates focus on life sciences at Medtec 2008  
NEC, Hall 12, Stand 419**

Norgren's 25 years experience of working in the medical sector has earned us a unique reputation as a world-class supplier of specialised fluid control solutions for the medical market. As a global partner for precision liquid and gas control, integrated solutions and cutting edge technologies Norgren has a focus on the life sciences market. Kloehn is the most recent addition to the Norgren portfolio and is one of the most respected names in fluidic components and assemblies

Specialising in developing customised solutions and integrated fluidic platforms (IFP's) for analytical, diagnostic and medical OEMs, Kloehn is a particularly strong brand in the life sciences market. An extensive product range includes high-quality syringes and pumps, needles and probes, ceramic, shear and solenoid valves, valve drive modules, specialised fittings and tubing assemblies.

As an innovative leader in the precision fluidics market, Kloehn is able to meet most OEM liquid handling requirements. As part of Norgren`s focus on Fluid Controls – alongside other established Life Science brands such as FAS and KIP – Kloehn`s market expertise will complement existing miniature solenoid valve, pressure regulator, media isolation valve and proportional technologies, as well as Norgren`s system capabilities including manifolds in acrylic and other high grade polymers.

**Editors notes:**

Norgren is one of the world leaders in the supply of motion and fluid control technologies for a wide variety of different industry sectors and is committed to optimising technological performance for its customers` advantage. All of Norgren`s solutions are engineered for flexibility based on strong product fundamentals.

Application specific solutions frequently involve integrated or modular combinations of actuator, control valve and air preparation technologies utilised in projects such as ultra fine control of dosing valves for a child`s respirator to the arduous environment of on board vehicle suspension systems.

With established manufacturing facilities in USA, Germany, UK, Switzerland, and Spain and with newer facilities in Mexico and the Czech Republic Norgren has the global manufacturing and support capabilities to be able to cope with the most demanding international projects.

Featuring support through an established sales and service network in 75 countries Norgren has the global reach and capability to ensure continuity of supply and local support where it is needed for customers involved in export markets or multi site operations.

With three global technical centres in USA, Germany and the UK supported by 270 engineers Norgren is a subsidiary of the £1.6bn IMI PLC.
