

Press Release

MBBS to present latest solutions for traceability of medical devices at MEDTEC Europe in Stuttgart

Cortailod/Switzerland, February 24, 2009. The RFID specialist MBBS SA will present its latest solutions for traceability of medical devices exposed to steam sterilization and cleaning chemicals at MEDTEC Europe from 3rd to 5th March 2009 in Stuttgart. Members of the MBBS team can be met at stand number 1774. The MEDTEC Europe is the premier trade fair for the medical device manufacturing industry.

MBBS provides a full range of RFID products and solutions dedicated to the traceability of medical devices exposed to steam sterilization and cleaning chemicals. In terms of security as well as time and cost savings, the use of the MBBS technology to be presented at MEDTEC Europe shows important benefits for hospitals and manufacturers of medical devices. "In times of increasing importance of safety controls in the medical sector, we are very excited to show the advantages of our products on site at the MEDTEC Europe", commented Philippe Hermann, Sales and Project Manager of MBBS.

About MBBS

MBBS SA develops and manufactures RFID solutions, tags and readers for harsh environmental conditions, providing a full product range dedicated to the traceability of medical devices exposed to steam sterilization and cleaning chemicals. The unique and patented technology of MBBS is used for a large variety of applications in the medical sector, in construction and building as well as other industrial sectors.
