

## Clean Your Rusted Metal Parts at the National Manufacturing Show

*Rosemont, IL* -- Daubert Cromwell will stage daily demonstrations of Evapo-Rust de-rusting liquid during the 2008 National Manufacturing Show, using visitors' own metal parts and tools they bring to Booth 5013 during the show, Sept. 23-25 in Rosemont, IL.

Visitors can soak their rusted metal parts in Evapo-Rust, a non-toxic, water-based solution that removes surface rust without scrubbing. It works in 20 minutes to 24 hours without using gloves or brushing. The odor-free, non-acidic reusable liquid eliminates need for blasting, grinding or using harsh caustics and chemicals. Evapo-Rust's neutral pH formulation bonds and removes rust, yet doesn't affect metal compositions, plating or even non-oxide paint coatings.

Evapo-Rust is:

- Reusable. One gallon de-rusts approx. 300 lbs. of steel, or about 20 lbs. of dry rust.
- Non-acid, non-caustic. Neutral pH means no special handling or gloves required.
- Non-toxic, biodegradable. Safe for the environment.
- Disposable. Spent solution can be disposed of safely down the drain in most cases.

Daubert Cromwell will also display all its VCI papers, films, bags, emitters, and liquids at the National Manufacturing Show, which runs Tuesday through Thursday, Sept. 23-25, at the Donald A. Stephens Convention Center in Rosemont, IL. For advance copies of product literature or the name of your nearest distributor, call 800-535-3535 or send an e-mail to [info@daubertcromwell.com](mailto:info@daubertcromwell.com).
