**Pres-On Silicone Foam Tapes Securely Seal Outdoor
Lighting, Electronics Cabinets and HVAC Units**

ADDISON, IL, November 29, 2007 – Combining the lightness of foam with the proven sealing power of traditional sponge rubber, new S-600 and S-800 silicone foam tapes from Pres-On® safely seal and protect outdoor communications, electronics cabinets, HVAC units and HID lighting enclosures from rain, fine particles, and extreme climates. Both tapes are UL recognized for flame retardance and gasketing.

Available in several thicknesses, colors (red, gray or black) and lengths up to 60-feet, the medium density tapes feature either an acrylic (S600) or silicone (S800) pressure-sensitive adhesive on one

or two sides. Both tapes exhibit excellent memory and low stress relaxation qualities, along with superior resistance to UV light, ozone and corrosion.

For a free sample, phone 800-323-7467. On the web, www.pres-on.com. E-mail: sales@preson.com.

ABOUT PRES-ON

Founded in 1949, Pres-On is a leading manufacturer of adhesive coating, coated foam tape, mounting substrates, gaskets and cap liners serving customers worldwide in the industrial and consumer markets. Pres-On is based in Addison, Illinois.
