

## NEW PRODUCT INFORMATION

For Immediate Release:

### New Ultra-Compact Pressure Transmitters

The new Ashcroft® GC51 and GC52 gauge and differential pressure transmitters offer the ideal economical alternative to network process transmitters when a digital protocol is not required. The innovative design features an ultra-compact NEMA 4X/IP65 enclosure *measuring only 2.65" in diameter*. Stainless steel wetted parts accommodate either wet or dry media. The GC51 is available in ranges up to 0-7500 psig and the GC52 offers D/P ranges up to 400 inches of water. A built-in LCD display and a 4-20mA output provide both local indication and remote signaling.

To learn more about Ashcroft® GC pressure transmitters visit [www.ashcroft.com](http://www.ashcroft.com) or call **800-328-8258**.

**Editor — Please print company contact information as follows:**

Ashcroft Inc.  
250 East Main Street  
Stratford, CT 06614-5145  
(203) 378-8281 • 1-800-328-8258 • [www.ashcroft.com](http://www.ashcroft.com)

Ashcroft® Inc. manufactures gauges, thermometers, switches, transducers, transmitters, data loggers, calibration equipment and isolators for pressure measurement, monitoring and control. Product brands include Ashcroft®, Heise®, Willy™ and Weksler®. As a global provider, Ashcroft® Inc. maintains a network of manufacturing facilities, sales offices and distributors worldwide. The company's website can be accessed at [www.ashcroftinc.com](http://www.ashcroftinc.com).
