

Ms-35 Product Description

The newest addition to the Anhydro product line is the MicraSpray-35. This new laboratory unit was designed for small scale R&D work. With a minimum batch size of 50ml's, this machine is ideally suited for small scale pharmaceutical work or when material cost is a consideration. The wireless HMI and plug and play utilities allows for easy placement of the machine in the room. This spray dryer provides a clear path forward with predicable scalability and easy transfer from the laboratory to manufacturing.
