

## New Product Press Release

### Conical Dryer/Mixer for Chemicals

Bolz-Summix conical dryer/mixers are designed for various processing tasks required in chemical manufacturing.

Typical duties are drying under vacuum, mixing-blending, solvent recovery, liquid or gas injection, and can be carried out with absolute precision. Conical dryers can dry down to the lowest levels of moisture content and gently handle the product to avoid damage to the most sensitive materials, deliver the highest mixing accuracy, without segregation during discharge in a fully safe and enclosed environment. Units also feature the most advanced and patented features such as heated mixing screw or heated internal cone, CIP systems.

Sizes range from 10-19,000 liters.
