

Super-D-Canter Centrifuge

The Pennwalt Super-D-Canter is a specially developed Solid-Bowl decanting centrifuge for effective continuous separation of liquids & solids from incoming feed slurry.

Key benefits provided by the Super-D-Canter are:

- Only (1) drive motor is required
- High abrasion points are fitted with replaceable parts
- Advanced polymer injection system reducing polymer consumption
- Highest Processing Efficiency
- Economical Cost & Operation

In comparison to conventional separation equipment and methods, the Super-D-Canter has minimum power consumption with only (1) motor, delivering costs savings in energy, space, manpower and maintenance cost.

Typical applications:

- Separation of frying oils from solids for reuse of the oil
- Lactose Dewatering
- Meat Rendering
- Food products Dewatering
- Waste sludge dewatering
- Fishmeal

Typical industries served are Food, Wine, Chemical, Pharmaceutical, Wastewater, and Pigments & Dyes.
