

# ***MD&DI* November 2009**

## **Equipment and Supplies Directory**

(You must be advertising in this issue to be included)

### **Guidelines for Submission**

1. Only advertisers in the November 2009 issue will be included in the directory.
2. **All company descriptions will be edited to meet the magazine's editorial requirements.** Due to the tight schedules involved, the edited copy cannot be made available for review before publication.
3. Company descriptions should address the equipment and supplies offered. Information about personnel, company history, etc., cannot be used. Ideally, submitted copy will be **50** words in length. Listings should focus on the specific technical characteristics of the equipment and supplies. Please avoid generalities and sales language ("in business since," "leading supplier of," etc.).
4. You may check only **three boxes** in each category.
5. Check only equipment and supplies that can be used to make a medical device. Components that can be integrated into a medical device or materials that can be used to make components (plastic resin or film, reagents, metal, textiles, etc.) should not be listed. These are featured in other directories during the year.
6. Submissions **must** be accompanied by both completed pages of this form.
7. If you would like to run last year's company description, please check the box on page two.

### **Company Contact Information**

This information, except for the contact name and title, street address, and name of person completing form, will appear in the directory. Please make necessary changes.
