### VALUE PLASTICS INTRODUCES MORE CHECK VALVES TO ITS PRODUCT OFFERING AT MD&M WEST 2009

Fort Collins, Colo. – February 10, 2009 – Value Plastics, a premier OEM supplier of precision plastic components, introduces SCV Series check valves for medical devices. These new check valves come in multiple medical grade materials and sizes to meet a diverse set of fluid management applications. The check valves, which are being unveiled at Medical Design & Manufacturing West (MD&M West), Feb. 10-12, 2009 in Anaheim, Calif., are ideal for medical device designers focused on infusion, drainage and irrigation applications.

Following on the introduction of DCV Series double check valves in January, 2008, SCV Series products are available in anti-siphon or one-way check valve configurations in a variety of materials and end fittings. The valves feature low priming volume, ease of removing air bubbles during priming and operate in any spatial orientation. The patented design of the latex-free platinum-cured silicone diaphragm prevents sticking and assures trouble-free operation. All materials satisfy USP Class VI and ISO 10993 criteria. End fittings include .118" (3.0 mm) x .161" (4.1 mm) and .122" (3.1 mm) x .165" (4.2 mm) tubing, and male and female luer tapers complying with ISO 594-1 and 594-2 standards. All products are suitable for EtO or gamma sterilization, and autoclavable options are available on special order. All SCV Series check valves are suitable for use with air or liquids.

Jim Pisula, Vice President, Marketing for Value Plastics, explained that the company has received many requests for check valves from their customers, saying, "Given this high degree of interest and a unique feature set, we knew the time was right to expand our product offering."

For ease of testing concepts, Value Plastics offers samples in all available configurations. For samples or to order new SCV Series products, contact Value Plastics directly. SCV Series products are available from Value Plastics through its direct sales force, web site, major industry catalog sources and worldwide business partners. Value Plastics, Inc., 3325 South Timberline Road, Fort Collins, Colorado 80525, phone 970-267-5200, toll free in U.S.A. 888-404-5837, and fax 970-223-0953, <http://www.valueplastics.com>

#### About Value Plastics

Value Plastics, Inc. makes and markets an innovative line of fluid management components designed specifically for flexible tubing. Products designed and manufactured include quick connect fittings, luer fittings, check valves, tube-to-tube fittings, threaded fittings, sanitary fittings and NIBP blood pressure monitoring components. Value Plastics products find global application in demanding health care OEM, research and specialty industrial applications.
